HTML Text

Verdana is the recommended default HTML choice. Verdana, too, along with Interstate, offers greater levels of legibility and readability online. The font is designed with a greater amount of space in between the letters, which is less taxing on the eye for online reading. This Sans Serif font is aligned with offline Sans Serif font Optima, as well as Interstate. It should be used for the majority of HTML text.

Specifications

Type for the LexisNexis online site has two levels of information, and thus, two sizes for HTML text.

PC: Intro copy: Verdana, Helvetica, Arial, Sans-Serif size 2

PC: Body copy: Verdana, Helvetica, Arial, Sans-Serif size 2

PC: Small copy (ex. "Search Tips"), Verdana, Helvetica, Arial, Sans-Serif size 1
